Organization

- Exercise classes take place every Monday and every Tuesday from 16:00 to 18:00.
- Both exercise sessions each week will cover the same material and the same exercises will be solved, so it is enough to attend only one.
- There is a focus group for students who feel they have a little less previous experience with analysis.
- Homework is uploaded every Friday and you have a week to solve the exercises and submit them on Moodle (deadline is on Friday the week after the exercises are released).
- Homework does not contribute to the grade bonus, but I strongly recommend solving it.
- You can gain a grade bonus up to 0.25 through Moodle tests that are released every 3. week.
- You can do the Moodle tests either on Monday or Tuesday. The exercises in the Moodle tests in the two exercise classes will be **different** but will be on the same material.
- To take the bonus tests you need to download the Safe Exam Browser. Please refer to the information in Allgemeines on Moodle to do so. Additionally, you need to be physically present in the exercise class to do the bonus quiz.

Thank you for your attention
and participation!
